- ▶ 874,436 pounds of GB (96,246 gallons ~ **0 remain**)

Deactivation Furnace

Leading the Way to a Safer Future

The U.S. Army Chemical Materials Agency (CMA), the Anniston Chemical Activity (ANCA), and the Anniston Chemical Agent Disposal Facility (ANCDF) are committed to the safe storage of chemical munitions and the safe and deliberate disposal of the entire stockpile while ensuring the safety of the public, the environment, and all involved in the storage and disposal efforts.

- ◆ Disposal is safer than continued storage.
- ◆ Since 1990, more than 10,980 tons of chemicals and more than 1,726,200 munitions have been incinerated.
- ◆ Pollution control systems protect people and the environment.
