

PBCDF disposal operations have safely eliminated:

| PBCDF WEEKLY TOTALS | AMOUNT |
|--------------------------------------|--------|
| Blister Agent Mustard Ton Containers | 14 |
| Blister Agent Mustard Pounds* | 10,739 |

| PBCDF PROJECT TOTALS | AMOUNT |
|---|---------------------|
| Blister Agent Mustard Ton Containers | 42 |
| Percentage of Blister Agent Mustard Ton Containers | 1.13 (less than 1%) |
| Blister Agent Pounds* | 32,234 |
| Percentage of Total Chemical Agent Tons (all campaigns) | 16.80 |

* Includes chemical agent destroyed in the Deactivation Furnace, Metal Parts Furnace and Liquid Incinerator Systems

PBCDF continues with Blister Agent Mustard Ton Container (TC) disposal operations. The Metal Parts Furnace primary, the Liquid Incinerator primary and secondary chambers are all at Normal Operating Temperature. Preparations continue for pressurized TC operations. Glove box training and Integrated Operations Demonstration operations continue. The current campaign is Blister Agent Mustard TC.

Pictured Above - TC 127: PBCDF employees raise a scissor lift to unload the ton containers from an Enhanced Onsite Container, after completing the routine monitoring and inspection to ensure that neither leaks nor any other damage occurred during the ton containers' transportation from storage igloos.

Pictured Above - TC 144: A PBCDF munitions handler uses a scissor lift to lower the ton containers once they are removed from the Enhanced Onsite Container, in the Lower Unpack Area. A nearby forklift will be used to transport the ton containers to an elevator, which will take them to the Upper Unpack Area where the ton containers will be vented for pressure in glove boxes before they are processed. *Photo – URS EG&G Washington Defense Group*

PBCDF Milestone Dates:

- PBA Stockpile Storage began in 1945
- Construction began in 1999
- Construction complete in 2002
- Testing and Training complete in 2005
- Disposal Operations began in March 2005
- Last GB M55 rocket destroyed in May 2007
- Last VX M55 rocket destroyed in Feb. 2008
- Last VX M23 landmine destroyed in June 2008
