### Update: Linear Projectile Mortar Disassembly Local LPMD operations end safely, successfully

Following a 54-week campaign, chemical munitions operations using the Linear Projectile Mortar Disassembly system here concluded earlier this month. The LMPD, a key component of future demilitarization operations at Pueblo (Colo.) Chemical Depot, was used extensively to accumulate reliability and maintainability data. The information, collected during the disassembly of thousands of agent-filled mortars and projectiles (16 percent of the Anniston mustard stockpile), is already providing valuable lessons learned that will contribute to the future success of the Pueblo Chemical Agent-Destruction Pilot Plant.
